Storey Publishing, LLC, 1994. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: The timber-framed home is attractive, affordable, and easily expanded to meet the needs of a growing family. With the step-by-step instructions in this book you can build your own classic timber-framed house -- one that's enduring, and features a level of craftsmanship rare in modern construction. Following the traditional "hall-and-parlor" home design, architect and builder Jack Sobon carefully and clearly explains finding the ideal building site; creating the master plan; selecting the best tree species; hewing and milling timbers; assembling the frame; installing wall sheathing, windows, and doors; designing and finishing the interior; expanding on the plan. One of the best-known and most distinctive figures in the timber-framing revival, Jack Sobon knows how to make home building affordable with economical hand tools, by taking control of the processing of building materials, and through using local inexpensive supplies. The basic house design of this book is easily adapted to meet different needs. Sobon's practical advice incorporates the latest knowledge on building a healthy house, integrating natural systems, and finding effective home heating solutions.
