In too many cases, illegal performance enhancement, so called doping , plays a dominant role in sports. This development might derive from the circumstance that sport is rather a business than an individual endeavour and self-realisation. Enormous amounts of money are involved in hosting events and marketing of athletes. However, increased doping actions may also result from the development and availability of various technical possibilities for performance enhancement. In the rather widespread field of doping, this paper focuses on the specific area of evidences on doping rule violations other than by so called analytical positives . This paper concentrates on circumstantial, non-analytical and evidence by longitude profiling. Concluding from the number of decisions, these forms of evidence play an important role in the conviction of doping infractions. Circumstantial evidences, for example, inhabit crucial importance in cases where an analytical sample is not available. This refers to...
