Position.--The West Indies is the general name given to the great archipelago lying between North and South America, and inclosing the Caribbean Sea. It includes three principal groups, namely: the Bahama Islands, the Greater Antilles, and the Lesser Antilles. The Greater Antilles are Cuba, Hayti, Jamaica, and Porto Rico. Characteristics.--1. SURFACE.--The Greater and Lesser Antilles are high and in mountainous regions contain several active volcanoes. The Bahama Islands are quite flat, but are only from six to ten feet above the level of the sea. They are the highest portions of a vast bank of coral rock which rises, with nearly perpendicular sides, from the bottom of the sea. 2. Minerals.--The Greater Antilles, have extensive coal fields and considerable quantities of gold, iron, and lead. The other islands have few minerals of importance. The Bahama Islands, and the Bahamas, are famous for the production of...
