

Unified Field Theory in One Energy Equation: Dynamic Energy for Electric-Magnetic, Mass, Waves

By Marcus O Durham, Dr Marcus O Durham Ph D

Createspace, United States, 1999. Paperback. Book Condition: New. 212 x 138 mm. Language: English . Brand New Book ***** Print on Demand *****.For centuries there has been considerable interest in developing a simple, but comprehensive relationship for physical systems including electric and magnetic, mass, and wave interactions, even before the concepts were well defined. Constraints to the problem have been curved space and divergence of time. An alternative coordinate system is necessary to satisfy these constraints. The mathematics are no more complex than vector algebra, in a curved space. Dynamic energy defines activity over time. One dynamic energy equation encompasses electric-magnetic, mass-diffusion, and constant-waves over time into a unified field theory for node, point or lumped parameters. The application of field volume and space vector provides a distributed fluid or field representation. The three terms in the unified field relationship succinctly describe Newton motion as well as Einstein relativity. As would be expected, Maxwell s suite of equations is inherent in the relationship. Planck s wave concept and energy bundles or quanta are integral terms.

Reviews

This type of book is everything and taught me to hunting ahead of time and more. It is actually rally interesting throgh looking at time period. You can expect to like just how the article writer write this publication.

-- **Murphy Price**

Definitely one of the best ebook We have possibly go through. It usually does not charge a lot of. I am just pleased to inform you that this is actually the greatest ebook i have got study in my own lifestyle and may be he greatest publication for actually.
