Brand New Book ***** Print on Demand *****.Prenatal and Perinatal Psychology has been studying our earliest development from the baby s point of view for over 30 years. Findings reveal we are conscious, aware beings who already have a sense of self as we begin human life. This book explores the mysteries of our multidimensional nature and the extraordinary stories babies, children, and adults tell us of their life in the womb and during birth. The Integrated Model is built upon clinical findings and extensive review of research in infant development, prenatal and perinatal psychology, integral psychology, and consciousness studies. The touching clinical stories included bring these new concepts alive and the 30 page bibliography gives the reader avenues to explore this territory more fully.
