## NON LINEAR TIME THEORY: SUCCESSOR TO THE EINSTEIN HOLOGRAM UNIVERSE

DOWNLOAD

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Non Linear Time Theory provides an intuitive approach to space, matter and force. NLT provides intuitive answers to what have been mysteries in prior theories. The list includes (1) the origin of space time, (2) the origin of quantum phenomena, (3) quantum time giving rise to quantum gravity, (4) the unified field relationship of gravity to other forces, (5) the origin of force, (6) the transitions of time dimensional coordinates to the different force and dimensional states we experience, (7) explanations of why we experience clock time (8) why it disappears at the speed of light, (9) the exponential growth of clock time concentration (10) the reasons for the perception of speed, (11) an explanation of why we can predict clock time 5, (12) wave-particle duality, (13) the successor of standard clock time that allow us to have self-awareness, and (14) the origins of what we have previously thought of as dark matter gravitational forces. Non linear time theory sets out to be an elegant, internally consistent theory of space time originally set out in vague terms in The Einstein Hologram Universe. It would be radical, even implausible, were it not for string hologram theory. It is partially developed. The book was written originally to be a 15 page grant application for the purpose of finishing it. It is mathematically incomplete, but intuitively correct. It undermines self-determination, it either discloses or creates a universe so vastly different from anything we experience. It questions space and time, envisioning an environment where those limitations do not apply. This is vastly different from an environment where you can move about instantly or travel back and forth in time. This environment is...
