

Low Carbon City: Policy, Planning and Practice

Filesize: 1.52 MB

Reviews

This pdf might be well worth a study, and a lot better than other. It really is simplistic but excitement inside the fifty percent in the book. Its been printed in an exceedingly straightforward way which is just after i finished reading this ebook through which really modified me, modify the way i believe.

LOW CARBON CITY: POLICY, PLANNING AND PRACTICE

DOWNLOAD

Discovery Publishing House Pvt. Ltd., 2009. Hardcover. Book Condition: New. While everyone is concerned with Global Warming, Low Carbon Development, Clean Development, Clean Development Mechanism and Tradable Carbon Development, most of the interventions are at the Scale or individual buildings. Not much attention has been given on adoption of ecologically compatible practices at the Urban scale. The urban planning and development Play a crucial role in environmentally sustainable future. As such, there is an urgent need to adopt a systematic and structured approach towards Clean Development Mechanism in urban planning and development, housing, services and construction. The cornerstone in making the Indian Settlement as low carbon is to adopt Integrated approach towards Ecology and environment. The urban Environment cuts across the various aspects of the environment, the habitat, Transportation and services management. The Natural resources include : the elements of Air and noise, Water (water bodies, river, lakes, drains and ponds- and ground water) and land with reference to open spaces, green areas and other surface and sub-surface conditions. The composite built environment includes the Environmental infrastructure-water supply, sewerage, Solid waste disposal and transportation network. The future of Indian City lies in adoption of environment friendly policies, plans and programmes and to implement long range and short range Measures to arrest impending crisis of pollution. However, the concept of greening urban environment is not limited to conventional development of parks and plantation, but is all embracing, including transport, industry, land use, environment, Infrastructure services, energy and Human Development which are crucially inter-related. This underlines the need to evolve and adopt innovative and mandatory norms and practices in urban planning and development-such as, water conservation and recycling, dual-pipe system, balancing Lakes and reservoirs, recovery of the River and water bodies and blue networks and green corridors. The concepts of Bio-drainage, Zero Run-off,...
