DEVELOPMENT OF MEASURES OF SUCCESS FOR CORPORATE LEVEL AIR FORCE ACQUISITION INITIATIVES

Biblioscholar Nov 2012, 2012. Taschenbuch. Book Condition: Neu. 246x189x7 mm. This item is printed on demand - Print on Demand Neuware - The goal of this research is to suggest a framework for developing measures of success for corporate level Air Force acquisition initiatives. Because this research is exploratory, it focuses on only one initiative: the 2002 Lighting Bolt initiative 'Focus on results, not process.' A qualitative method approach was used to suggest a four part framework. Through the review of literature, common steps for creating metrics were established and recurrent characteristics of good metrics were identified. Then interviews were conducted with acquisition practitioners who have experience with the initiative. Finally, those three parts were applied to the initiative as a case study and metrics suggested as a result. This study gives Air Force leaders clear, implementable metrics that can be used as measures of success for the initiative, and provides recommendations to improve this initiative's performance and that of future corporate Air Force acquisition initiatives. 122 pp. Englisch.
